MAMMAL QUESTIONS

Name: _____

General Questions to Consider:

- How are humans different from other mammals?
- Why is a whale a mammal and a shark a fish?

Jot Notes:

Choose ONE mammal and answer the following questions:

1. What is the scientific name of your mammal?

2. Where in the world is the animal *indigenous*? Identify and describe its habitat (example: grassland, desert, tropical forest, arctic, acquatic).

3. What is the average life span of your mammal? (in the wild and/or in captivity)

4. What temperature range is needed for the mammal's survival?

5. What is the mammal's predator? What is its prey?

6. What size area is appropriate for such an animal's survival?

7. Does your mammal need others to co-exist? If so, which ones?
